

HOW OUR NATIONAL POS PLAN WORKS

SummaCare Secure offers a National Point-of-Service (POS) plan that can provide comprehensive medical coverage to your retirees in Ohio – and across the country.

Plan Features:

- Our National POS plan is available when the majority of an employer group's eligible retirees live in counties where the SummaCare network of providers is adequate (SummaCare follows Federal guidelines to determine the counties that meet the standards of network adequacy)
- Our National POS plan is built around a network of providers (including doctors, hospitals and pharmacies) working together to provide high-quality care
- Our National POS plans provide the same level of medical benefits whether members are in or out-of-network so that retirees may continue utilizing the providers they know and trust*

With our National POS plan, your retirees will enjoy:

- A national Medicare Advantage option that meets their diverse geographic needs
- The freedom to choose any Medicare-approved provider throughout the United States

- Reduced out-of-pocket costs
- Access to comprehensive medical and prescription drug coverage (Part D), award-winning customer service and Disease Management programs

As an Employer, you'll experience:

- Plan options that can offer more competitive premiums than traditional retiree plans
- Streamlined plan administration with skilled, experienced professionals who will address your concerns personally
- The flexibility to choose the plan that will fit your needs and budget

For more information, please contact SummaCare Secure Group Sales at 330-996-8913.

*Providers must be participants in the Medicare program. If the provider selected does not accept payment according to the Medicare fee schedule, the provider may add up to 15% to the fees charged for their services.
